 ; another, 26 out of 101 ; another, from  
 , 4 from 106. There are records also

is considered desirable to acquire a market for our horses—and we have the best authority that no country in the world is so well fitted as this for the production of stock—attention must be given to the points here indicated.

by the Mackinac case of conspiracy to defraud, and not concluded. Mr. Butler presented for the defense and on the other side were Mr. Dalley, Mr. McLaughlin, Mr. McLaughlin, Mr. McLaughlin, Mr. McLaughlin (in his first brief), Mr. Davis and Mr. Belmont. The case was heard by the court on the 10th of May, for libel in the *Police News*, withdrew his appeal for time to plead, and at once pleading guilty, charged on his recognizances to appear when called to receive the sentence of the Court. In the second reading of the indictment, the jury returned a verdict of Patterson, for procuring the Justice Hargrave, a verdict of guilty, and he was sentenced to hard labour on the roads or other public works for a term of six months. The case of Henry Murray, charged with libel, was acquitted.

**W. B. DALLEY.**—Mr. W. B. Dalley has been spoken of, during the last day or two, as one of the representatives of the opposition of West Sydney in the coming election; but we have some reason to think that the best possible authority, that that gentleman intend again to become a member of the Legislature.

**MURDER.—ARREST OF SUSPECTED PERSONS.**—*Perth* correspondent writes:—About a fortnight ago a female child was found lying near the bridge, between Parmatanna station and the Fraser, from the evidence given at the inquest (reported  *Herald of 2nd November*), it appeared evident that it had come to its death by four means. A vessel

murder was recorded, and the Government offered of £50 for such information as might lead to the apprehension of the guilty persons. On the evening of 24th at Perth on the 17th instant, Calveley and HARRISON, mother and daughter, and the arrested. They were lodged in the Perth lock-up by sergeant Johnston, of Perth, and senior-sergeant of Perthshire, on the above charge, and were before the Perth Bench to-day (Thursday). The remainder of the 26th instant. The evidence in closed doors.

**FRIDAY'S STORM AND THE PITT-STREET WILFIRE.** Few persons who have been for any time resident in this city can have failed to notice, and to regard in the

old friends, a willow-tree, which has stood for  
many years in Pittu-street, close to Moore's Lohare  
and the docks, and the old house of Houglie's farm-  
rehouse. From the dimensions it is evident that it  
has been as great as that of the oldest loblatter  
South Wales, and that it must have witnessed (if  
he said to witness) from its once solitary post the  
growth of the city from the earliest period of its  
existence.

The old tree always bore a cheerful and rebo-  
nant, and for many years it was conspicuous about  
the city. It was the only tree that ever had so  
many of foliage than it has had the  
This no doubt, through giving a hold to the wind  
one cause of its downfall. The other is seen in

— was torn completely from the roots by an unheavly gust. No warning by creaking or heaving to have been given, and the massive trunk must have been in an instant. Happily, no vehicles, and but a few passers-by were passing, and had it been so in a crowded thoroughfare like Pitt-street it is easy to say what might not have occurred. As I was, woman, about forty years of age, passing along the street after having led a blind man across,

ck down by a branch and severely injured. Condequene procured a cab and took her to the city, where she was taken to Dr. W. L. Loom, Jr. It was found that a large livid bruise extended from the top of the head to the back of the neck, and she was scratched. She was sensible, but unable to bend or move her limbs, and it is feared that she may survive some injury to the spine. It has been said that the sufferer's name is Mary Wilson, and is a resident of Hayward. Late yesterday evening she still is in a very weak state, although recovering slowly. Through the fall of the tree, which went down across the street, traffic was suspended in the city for an hour. A number of persons were

and the task of demolition having been done the old widow was soon reduced into a number of useless logs and carried off to the dump where the downfall would believe it, for the grand old apparently firmly impressed them with an idea of duty. They would almost as soon have billeted wind had demolished Thornton's Hyde Park man. All will regret the disappearance of one of the English trees ever planted in Australia. The debris was not confined to these other things. The same time part of the roof of a large shed at the docks, Paramatta-street, was carried away. Vastly-pretentive trifling mishaps, such as the breaking fences, injuring flowers, &c., also occurred while

The storm was at its height. The gale was aided by the drifting sand, and had the greatest effect in picking up the debris through the streets keep clear of passing conveyances.

**HRAID.**—Connected with the Congressional at this place, on Wednesday evening, a large tea was held, followed by a public meeting. The object was to raise money to repair and beautify the town. The chair was occupied by Mr. Fairlie, and names and appropriate addresses were delivered by Messrs. S. Graham, Mary Ann, J. G. May, R. G. Reading. Thirty-four pounds were realised. It will require £18 or £19 more to make the repairs absolutely necessary. The whole arrangement

by a young lady residing at South Head. Her said seal was spoken of as beyond all praise. The superintendence is committed to the excellent Mr. T. S. Forrester, who is greatly assisted by the College students.

THE CHURCH, BURWOOD.—A tea meeting was held to take place in the grounds adjoining St. Luke's Burwood, yesterday afternoon. A tent had been erected for the purpose of entertaining the visitors, friends, and under it as it got towards 6 o'clock, were the requisites for a hearty tea. The proposition was that church a kind of a protest against the gloominess in spite of the threatening state of the weather. A large number of people were on the ground.

ladies had just completed the arrangements for the storm passed over head, and a gust of wind being felt, removed the fastenings, and brought in upon the tables, breaking crockery, and the loss of a meal of damage, which it will take some time to replace. Several of the ladies and very many of the men, from injury by entangling ropes and falling poles. By some the sudden catastrophe was attributed to lightning, which was particularly so at the time. The committee of management did not stand under the unfavourable circumstances in which they were placed, and put the worst face on the matter, and congratulated themselves that no injury, either to limb, had ensued. Shelter was found in the

and refreshments were there taken by all any inclination that way. Had it not been through favorable weather, and the unseasonable storm, it is estimated that no less than three hundred people would have gathered together on the lawn. A meeting of business and friends intended to have been held in the case, had to be postponed. Among the visitors here were Dean Cowton (who was to have taken the Rev. G. H. Morison, and the Rev. H. S. Kneeland) was to take into consideration the advisability of the church, and also the most suitable manner in which to devote the money to be donated as a result of which the notice will be given.

[illegible]

society embraced a number of young men with other, month after month, for the purpose of having advantage of a spiritual interchange of thoughts, mutual advice, encouragement in Christian life, devotion, and for prayer. Mr. Jay (the Secretary) up a report, which was read and adopted by the meeting. The meeting was addressed by Mr. A. C. Drexler and other members present. The proceedings were with prayer.

MURDERERS OF MR. HALLIGAN.—The Brides of the 16th instant states that the police sent in a despatch in favour of the petition for a communication of the papers to the Hon. the Lord Palmer has proved to be a misfortune. He and Williams will be

the extreme penalty of the law on Wednesday, the  
stant, and we believe the executioner will leave by  
northern boat to make the necessary preparations.  
d, the third of the convicts, would have been  
with the others, but for the fact that the law pres-  
cribes during his trial has yet to be argued before the  
Assize next term, which commences 7th December.

fication, for the sum of £12. It was moved by  
messrs Russell,—“That a wooden culvert be erected,

Swich and Lane Cove Road, near Parker's." Carried.  
as moved by Alderman French,—“That application be  
to the Government to recover the road from Mr.

Hub's north-east corner to Montary's grant, making deviation as they may deem necessary." Postponed next meeting. It was moved by Alderman French,—that a stone culvert be erected on Mowbray Road, three square, opposite Cook's piggery; that waterable be ten foot deep by four feet wide on higher side of road; to be tendered for by the road; material taken out of waterable to fill up the approaches to culvert." Amendment by Alderman Pollard,—"That culvert eighteen inches square, instead of three feet." Carried. It was moved by Alderman French,—"That a

of high road from the bridge, as far as required, to be ordered for by the road." Carried. It was moved by Mr. French,—"That a committee be appointed to inquire and report on culvert recently erected in front of the 'M's., to consist of Aldermen Pollard, French, and Bry-  
Carried. It was moved by Alderman French,—"That the Working Committee be dissolved, and no other appointed." Withdrawn. It was moved by Alderman French,—"That a stone culvert be erected, 18 inches high, near the junction of Penhurst-street, on Mowbray-street." Carried. The motion by Alderman Broadfoot,—"That the Corporation purchase the site of the old railway station, at the corner of the

er, "For the clearing the road at Burn's Bay, from  
Charlie's fence, and that application be made for a  
ation in the road." The Council then rose.

The Melbourne *Arms* of Monday reports:—

The import market we continue to note a fair trade demand for at \$15 10s for best brands in trade parcels, while larger lots can be purchased at \$15. For best tonnage make a nominal bid of \$16 is still quoted, but we do not hear of any actual auctions beyond \$15 10s. 150 tons will be offered by auction on Tuesday. Wheat is steadily maintained at 7s to 7s 2d, grading to quality. For maize, a fair inquiry for the purposes is reported at 4s 9d to 4s 10d. To attract our attention, and pending the disposal of a number of 6000 bushels, a further

pressed Bangkok rice to hand a few days ago via Maritima, Clara Sayers—\$20 tons—has changed hands on private terms. The buyers, we hear of a sale of a considerable parcel of 10 per cent. op. rum at 9d for hogheads and quarters. In candies is nothing doing being privately, as the trade generally evinces an inclination to follow up the movement lately reported that market. Holders, on the other hand, offer no increment to any inclined to purchase large parcels, and are to quote under 10d for best brands—*a price which*

Customs during the week amounted to 129,641 oz. The total quantity exported since the beginning of the year has been 8,190 oz., of which 242,370 oz. were transshipments from New and. The total exports during the corresponding period of year amounted to 1,742,029 oz., of which 305,228 oz. were produce of New Zealand gold-fields.

*Attendant Mercury* writes:—A few days ago a lad by the name of Conway, in the employ of Mr. Waller, of Wallis-  
ton, and only about twelve years of age, was bitten by a  
snake on the leg whilst in the bush. The lad, after being  
injured, immediately turned upon the snake and killed it,  
whereupon he sat down upon the grass, and deliberately  
cut out a part of the flesh where the snake had bitten him,  
with his pocket-knife, and made it bleed pretty freely.

where he was bitten. After performing this operation he hastened to his master's residence, some two or three miles distant, where the bitten part was again treated, and a messenger sent to the boy's father, who rode some six or seven miles away. On his father's arrival the boy was very much disposed to sleep, but some remedy having been administered, he immediately appeared of better of this desire for sleep. For fear of any

re medical advice was obtained; but we learn that the immediate presence of mind displayed by the lad in first instance, all danger was overcome, and there was need of medical treatment when he reached Dungog.

...au/nla.news-page14

which complete the matter of the

has the idea become, that the reference to it may seem childish; but from mechanics let us pass on to chemistry, and the case will be found by no means so clear. When chemists ceased to be content with the mere ultimate analysis of organic substances, and set themselves to study their proximate constituents, a great number of definite chemical compounds were obtained which could not be formed artificially. I do not know what may have been the usual opinion at the time among chemists as to the possibility of

tion. Probably it may have been imagined that chemical affinities were indeed concerned in their formation, but as they may also be modified by an assumed vital force. But as we advance, we progressed many of these organic substances were formed artificially, in some cases from the elements and prepared from artificial substances, in other cases actually from their elements. These substances must indeed be accepted with one qualification, as stated several years ago by M. Pasteur, and it was that, while the statement still remains true, that no substance the solution of which is optically active, rotating the plane of polarization of polarized light had been formed artificially from substances not possessing that property. Now several of the natural substances, which are optically active, have been produced artificially are active, in the sense of rotating the plane of polarization; and, therefore, in their being inactive, artificial substances cannot be absolutely identical with the natural ones. But the inactivity of the artificial substance is readily explained on the supposition that the artificial substance is related to the natural the same relation as racemic acid bears to tartaric.—And that, so to speak, the mixture of the natural substance with its mirror image in a mirror. —When we consider by what a peculiar and troublesome process M. Pasteur succeeded in separating racemic acid into the right-handed and left-handed tartaric acids, it will be at once understood that, in the future, it will be a fact, of the existence in the natural world of a mixture of two substances, one right-handed and the other left-handed, but otherwise identical with each other, and that it is in this case, at this point, to the clearing up of which it is desirable that chemists should direct their attention. A curious then, the difference of activity or inactivity, which we have seen to be a fact of a simple physical character, being, therefore, the cause of the difference

remains to be investigated, we may say that at the present time a considerable number of what used to be regarded as essentially natural organic substances have been formed in the laboratory. The better part of it is due to the fact that we suppose that in the plant or animal from which the organic substances were obtained they were formed by the play of ordinary chemical affinity, not necessarily nor probably by the same series of reactions which they were formed in the laboratory, when a high temperature is commonly employed and by chemical reactions of some kind, under the agency in many cases of light, an agency scarcely employed by the chemist in his laboratory. And since the boundary between the natural substances which have, and those which have been formed artificially, is one which, so far as we know, simply depends upon the amount of our knowledge, and is continually changing as new processes are developed, we are led to extend the same reasoning to the various chemical substances of which organic structures are made up.

But do the laws of something, to which, as I have endeavored to show, all life, whether vegetable or animal, are in living bodies, really subjected? Or are they, as I have rejected, together with those of capillary attraction, of diffusion, and so forth, account for the formation of the organic substance, and the elaboration of the chemical substance of life? Is it composed? No more, it seems to me than the laws of motion account for the union of oxygen and hydrogen to form water, or the laws of crystallization account for the formation of crystals. If matter so uniting is subject to the laws of motion, matter so uniting is subject to the laws of motion during the act of union just as well as before and after. In the various processes of crystallization, and precipitation, and evaporation, and so forth, in dead matter, I cannot see the faintest shadow of an approach to the formation of an organic structure, still less to the wonderful series of changes which are contained in the growth and perpetuation of even the lowliest plant. Admitting that the laws of motion, however, though not completely demonstrated, the applicability to living beings of the laws which have been demonstrated with reference to dead matter, I feel constrained at the same time, to add, that there is a mysterious something lying beyond—a something not genuine, which I regard, not as balancing and sus-

What this *something* which we call *life* may be is a profound mystery, but it is certain that it may lie in the chain of dependent causation we may justly call behind: we know not how few. It would be presumptuous indeed to assume in any case that we have already reached the last link of the chain. It is no more presumptuous to assume that the prevalence a fellow worker who attempted to push his investigations yet one step further back. On the other hand, if a thick darkness enshrouds all beyond, we have no right to assume that we have reached the last link of the chain; a stage where further progress is unattainable, and we may only refer to the darkness as the boundary stepped to the fiat of an Almighty Power. To assume the contrary as a matter of necessity is, practically, to renounce the First Cause of all to an infinite distance from the boundary, and to assume that we have already clearly known and what is veiled in impenetrable darkness is not ordinarily thus sharply denied. Between two there lies a vast mystery region, in which we have no discernible form, and which we may call which are yet beyond us. But the general principle is not affected thereby. Let us fearlessly trace the degree of darkness which we link for a moment, and then trace it, but let us take heed that in this studying second causes we forget not the First Cause, nor shut our eyes to the wonderful proofs of design which, in the study of organised beings especially, meet us at every turn.

WHOLESALE EFFECTS OF SCIENTIFIC INQUIRY.

Now, must we suppose that the one truth contradicted another, even though the two may have arrived at by totally different processes, in the one case, suppose, obtained by actual scientific investigation, in the other case obtained by the testimony of a witness? Must we suppose that the two different processes of course there may be on the one side or on the other, causing apparent contradictions? Every mathematician knows that in his private work he will occasionally by two different methods of arriving arrive at discordant conclusions. He is at once aware that there must be a slip somewhere, and correct himself by the more correct method. When we rest on probable evidence, the concluding apparent contradictions is not so simple and certain. It requires the exercise of a calm, unbiassed judgment, capable of standing at bay to the force of the question; and oftentimes we have long to suspend our decision, and seek for further evidence. None need fear the effect of sudden insight, carried on in an honest, unprejudiced, humble spirit, which makes us so ready falsely to avow our ignorance of what we cannot explain that to accept conclusions based on sound evidence. The

Where from the phenomena of life we probe into those of mind, we enter a region still more grossly mysterious. We can readily imagine that *as yet* here be dealing with phenomena altogether transcending those of mere life, in some such way as the life transpired, as I like to characterize, those of chemistry and molecular attractions, or as the laws of chemical affinity in their turn transcend those of mere mechanics. Science can be expected to do but little more here, since the *as yet* is still so vast as itself the object of investigation. It can but enlighten us as to the depth of our ignorance, and lead us to look to a higher aid for that which most nearly concerns our well-being.

**BROWN AND STANFILD'S CONCENTRATORS.**

*(From the San Diego Independent.)*

For some years it was pretty generally believed in this district that the pyrites and quartz abandoned in gold, or that at least gold escaped from them out of the crushing-machines. Various means were resorted to to catch the gold, but all proved ineffectual. Burning the quartz was found to swallow up all the additional gold obtained, and the pyrites, which the bubble, although a vast improvement, did not turn out to great as it was expected. Some months ago a new contrivance for saving the pyrites was brought prominently before the public, and has been attended with much success, and become so extensively adopted that descriptions of it are not needed. Brown and Stanfield's concentrator will not be out of place at the present time. Messrs. Brown and Stanfield are from California, where these concentrators are said to be extensively used. The machine is simple in construction.

THIS DAY, Friday, 19th November.

**ORBAT UNRESERVED CLEARING SALE,**

in consequence of the Proprietor leaving the Colony.

**VALUABLE CITY INVESTMENTS.**

**CUMBERLAND-STREET,  
PRINCE-STREET,  
PORT-STREET,  
PALMER-STREET.**

**RICHARDSON and WRENCH** have received instructions from **WILLIAM HOGAN Esq.** to sell by public auction, at the Rooms, Pitt-street, THIS DAY, Friday, 19th November, at 11 o'clock.

The following city freeholds:

**CUMBERLAND-STREET.**  
**LOT 1.**—Four dwelling-houses, No. 167, 169, 171, and 173, CUMBERLAND-STREET, each side, and which contains 8 rooms and kitchen, and three six rooms and kitchen, erected upon a block of land having 63 feet 6 inches frontage to Cumberland-street, and bounded on the south by WATSON'S PROPERTY, and on the north by property belonging to Mr. J. G. LONG. Rental, £232 6s per annum.

**LOT 2.**—Two brick and stone-built dwelling-houses, Nos. 61 and 63, PRINCE-STREET, west side, and one cottages adjoining, Nos. 65 and 67, PRINCE-STREET, erected upon a block of land having 6 feet 6 inches frontage to Prince-street. Rental, £197 17s. 6d. per annum.

**LOT 3.**—Large block of land, 35 FEET FRONTAGE east side of the north end of Prince-street, together with the FIRST-CLASS well-finished FAMILY RESIDENCE, containing 16 rooms, overlooking the harbour. Rental, £104 PER ANNUM.

**LOT 4.**—2-story brick-built house, No. 56, PRINCE-STREET, and an adjoining Mr. Jones's Buildings, and erected property formerly belonging to Mr. Kurts, opposite upon allotment of land No. 10, of section 73 of the city, having 16 feet frontage to PRINCE-STREET. Rental, £41 12s. 6d. per annum.

**PRINCE AND PORT STREETS.**  
**LOT 5.**—Cottage residence, No. 99, PRINCE-STREET, on the west side, a free dooce north of Prince-street, erected upon an allotment of land having the following frontages—  
36 FEET TO PRINCE-STREET  
24 1/2 FEET TO PORT-STREET.  
Rental, £78 per annum.

**PALMER-STREET, WOOLLOOMOOLOO.**

**TWO BRICK-BUILT two-story HOUSES,** containing each verandah, hall, 4 rooms, kitchen, and servants' room, with nicely arranged flower-garden in front and also good yard, underground water-tank, &c., at the rear.

The land has 42 feet frontage to the STANMORE ROAD, with a depth of about 103 feet.

THIS property occupies a choice position in the improved locality of the new house adjoining Mr. Allen's property, and close to the residence of Mr. PERRY, Esq.

**RICHARDSON and WRENCH** have received instructions to sell by public auction, on the Rooms, Pitt-street,

**THIS DAY, 19th NOVEMBER.**

At 11 o'clock

The above described freehold property, Stanmore Road, Newtown.

Terms at sale.

**CHRISTIE and WENTWORTH'S**  
**MACQUARIE RIVER STATIONS.**

**ABSOLUTE and UNRESERVED SALE** in consequence of the death of J. CHRISTIE, Esq., and the continued residence of the surviving partner in England.

**WELLINGTON DISTRICT.**

**LOT 1.—NARRAMINE,**  
celebrated for its fine country embracing about 144,000 ACRES of rich fatstock pastures, with valuable improvements, and 3500, more or less, VERY SUPERIOR BREEDING CATTLE.

**LOT 2.—GANALANG and BERRY GREEN.**  
Three splendid blocks of country with improvements, containing six blocks of fine country embracing 1500, more or less, of CHOICE BREEDING CATTLE, 6000 more or less SHEEP, and a number of about 300 PURE BRED CATTLE.

**3.—MERRABONGA, BUTTERBONE, and COLLYBAR.**  
Three adjacent blocks containing about 108,000 ACRES of rich country, with 3000, more or less, WELL-BRED CATTLE, chiefly males and sex fatening, 4000, more or less, WETHER SHEEP.

**BLIGH DISTRICT.**

**LOT 4.—HADDON RIVER.**  
Fifteen splendid blocks of country, covering an area of about 215,634 ACRES, well watered by the Macintyre, and numerous creeks, lagoons, wells and dams—equal in dry seasons to the best of the district.  
75,000 SHEEP.

**HADDON RIGGS** is about 50 MILES FROM DUBBO and has most important and extensive improvements. It will be sold with

40,000 SHEEP, more or less.

\* \* Stores, working plant, and other belongings appertaining to the respective Stations to be taken by the purchaser of each lot, at a valuation, to be settled by arbitration in the usual way.

**TERMS.—ONE THIRD CASH** deposit, *residua* to be paid by instalments in equal amounts of 1, 2, and 3 years' date, having interest thereon at the rate of 5 PER CENT. PER ANNUM, and secured upon the property by mortgage in the usual way.

**PRELIMINARY NOTICE.**

**R**ICHARDSON and WRENCH have received instructions from T. J. Ash, Esq., of behalf of W. C. Wentworth, Esq., to sell by public auction at the Rooms, Pitt-street, Sydney, on  
**MONDAY, the 14th February, 1870,**  
at 2 o'clock  
the above valuable station property, full particulars of which will shortly be published.

Choice Allotments, at Gladsville,  
Parramatta River.

**JAMES DEVLIN, Jun.**, has received instructions from Mr. Charles Miller to sell by auction on **SATURDAY, the 20th of November, at the Gladsville Hotel, Bathurst.**

The above choice building allotments, situated within a few minutes' walk of the steamers' wharf. Further particulars apply Victoria Chambers.

Valuable Property, Town of Bathurst.

The Property known as **AUSTIN'S CORNER**, at the junction of William and Durham streets.

**R. and W. OAKES** have instructions from Mr. R. B. Martin to sell by public auction at their Rooms, School of Arts, Bathurst, on **MONDAY, 5th December, at 2 o'clock.**

That really valuable and centrally situated corner block of buildings, having a frontage of about 135 feet to Cook—William and Durham streets, and immediately opposite the Hay and Corn Markets.

The improvements are—  
Two-storied houses, 40 feet by 60, of 14-inch brickwork divided into separate compartments for the business of a large hotel, and having a rear entrance for a large addition to that can be taken advantage of to suit the approach of the railway, and upon which the foundations and cellars have been laid.

On the William-street frontage are erected four commodious shops, with detached kitchens, and are easily and advantageously made into one large property. The frontage is divided from the adjoining property by a party wall of about 90 feet long and about 30 feet high, which wall has been made into a strong wall.

On the Durham-street frontage stands the **Louisa Manufacturing**, with extensive stable and out-offices.

At the rear of the four shops is an extensive oven or bakery.

Speculators, and those seeking investment, are invited to inspect the property, as such a rare opportunity of first class property is not often offered.

All the improvements are new and of the most substantial character, no expense having been spared in the erection.
